

How DO I Quickly Tell and Read 24 Hour Military Time?

To understand military time is pretty easy. Take 12:00 AM as 0000 and every morning hours has a leading zero before the standard time 1:00 AM becomes 01:00 until 12:00 PM . Then any hours after this noon time is added to 12. This means 1: 00 PM becomes 13:00 and 2:00 PM becomes 14:00.

If you understand better, then what time is 11 pm in military time? - **11:00 p.m. — 2300 hrs right?** That is great , check the table below.
